

PROCESS ENGINEER

ROSHNI

"I love watching the show "how it's made", which is why I became a process engineer. I really enjoy using science and technology to create processes that produce great tasting snacks.

TOP TIP!

With a STEM background your career possibilities are endless. Your unique way of thinking and problem solving skills makes you extremely versatile.

EDUCATION

GCSE's including Science, Maths, English, Textiles & Business

Master's Degree in Chemical Engineering

A Levels in Chemistry, Biology & Maths

EXPERIENCE

6 years at PepsiCo as a Process Engineer developing novel processes & healthier snack foods

ROLE AT

PEPSICO

In the Europe Breakthrough Team we are using emerging trends to create healthier snacks that you will see on the shelf in 3-5 years' time.

I use my understanding of STEM subjects & process engineering to translate a paper based concept to an actual physical product which is produced at a large scale in a factory.
